SAMSC Autotest Co-ordinator report

To date there have 3 or 4 events held, I don't have any reports so I don't know how many entries they had.
The first counter in the 2023 RALLYSCORE Scottish Autotest Championship was due to be the 750MC event on 05/03/23. Due to venue constraints, the 750MC event had to be moved a week early, unfortunately this created a date clash with similar events and now this counter will be held later in the year.
Now the first counter will be the Andy Wilson Memorial Autotest held by GMSC on 09/04/23 at Knockhill, this will be a charity event supporting the Brittish Heart Foundation. There will be 3 different disciplines in the GMSC event – an All Forward PCA, a Novice Autotest and a Clubman Autotest, we have not tried this format before, the aim is to encourage new competitors to Autotesting using less technical tests. GMSC are now a registered Street Car accredited club and we hope to recruit some brand new competitors to our sport.
